PROFILE SUMMARY

Highly adaptable and results-driven Software Developer with strong technical expertise in problem-solving, critical thinking, and innovative approaches. Seeking to apply technical expertise in building scalable solutions while leveraging prior industry exposure through one year of apprenticeship training.

EDUCATION

UG-Saranathan college of Engineering
Bachelor of Engineering - Computer Science and Engineering *SEP 2023 – APR 2026*

Rane Polytechnic Technical Campus
Diploma in Mechanical Engineering *JUN 2018 – APR 2020*

EXPERIENCE

Apprentice Trainee JAN 2021 – MAY 2022
Coimabatore,TamilNadu

- Completed one-year government-certified apprenticeship in [domain – e.g., MACHINE SHOP]
- Gained hands-on exposure to industrial processes and teamwork in a professional environment.
- Assisted in CNC machine operations and quality checks, ensuring adherence to production standards and accuracy.

PROJECTS

Family Event Reminder System JUN 2024 – AUG 2024

- Developed a Family Event Reminder System web application using HTML, CSS, and Spring Boot with a layered MVC architecture.
- Implemented RESTful APIs in Spring Boot for creating, updating, and retrieving family events and reminder schedules.
- Integrated backend scheduling logic to trigger timely event reminders based on stored dates and user configurations

Predictive UPI Budget System MAR 2025 – AUG2025

- Implemented real-time fraud detection for suspicious transactions with instant alerts.
- Built predictive budget advisory using transaction history to warn users of overspending.
- Designed mobile-friendly dashboard for transactions, alerts, and analytics.
- Managed users, transactions, alerts, and budget logs with SQL database, integrating REST APIs.

Real-Time Voice-Based Cyberbullying Detection in Online Gaming OCT 2025 – DEC 2025

- Designed a Real-Time Voice-Based Cyberbullying Detection System for online gaming environments to monitor and analyze live voice chat streams.
- Implemented speech-to-text processing and NLP-based toxic language detection to identify abusive or harmful communication in real time.
- Built a low-latency backend pipeline to classify voice messages and trigger instant moderation actions such as warnings or voice muting.

TECHNICAL SKILLS

Languages: Java,JavaScript, HTML/CSS
Database: SQL
Frameworks: Spring boot,REST APIs
Tools: Postman,Inellji, VS Code,Git,GitHub
